

FLEX

FLEXIBLE GRP ROOFING SYSTEM

BROOF (t4)

External fire performance
classification for Flat Roofs

WHY USE TRIROOF FLEX SYSTEM?

Flexible Resin Formula

Designed to move with your surface, greatly reducing cracking and delamination.

Universal Primer

Used in conjunctions with Flex to promote bonding to most common surfaces and substrates.

Including concrete, osb, bitumen, asphalt, metal, and more.

Seamless Design

No joints, continuous seamless membrane.

Cold Applied

No hot works, no flame required.

Waterproof & UV-Resistant

Built to withstand harsh environments.

Superior Adhesion

Creates a strong bond even on previously coated substrates or uneven irregular surfaces.

Easy to Use & Fast Application

Ideal for tight deadlines and quick project turnarounds.

Cure Times

Cures in low ambient temperatures as low as 2°C, in under 2 hours.

High Durability

Suitable for new roofs, overlays and balconies. Stands up to heavy foot traffic, weather and abrasion.
