4. First Aid Measures

4.1. Description of First Aid Measures

First-aid measures general:

Call a poison center or a doctor if you feel unwell.

First-aid measures after inhalation:

Remove the injured person to fresh air and provide him with the conditions for free breathing. Remove the injured person to fresh air and provide him with the conditions for free breathing. Move victim to fresh air. In case of breathing problems: consult a doctor / health service. Call a poison center or doctor if you feel unwell.

First-aid measures after skin contact:

Remove contaminated clothing and shoes immediately. Wash contaminated parts of the skin thoroughly with soap and water. If irritation / allergy symptoms occur, consult a doctor.

First-aid measures after eye contact:

Consult a doctor immediately. Protect non-irritated eye, remove contact lenses. Rinse contaminated eyes thoroughly with water for 10-15 minutes. Avoid strong water stream – risk of cornea damage. After rinsing, put on a sterile – sterile dressing.

First-aid measures after ingestion:

Call a doctor immediately, show the packaging or label. Do not induce vomiting. Rinse mouth with water and then drink plenty of water. Never give anything by mouth to an unconscious person.

4.2. Most important symptoms and effects, both acute and delayed

Symptoms/effects after inhalation:

Dizziness, balance disorders, weakness, headaches, fatigue, nervousness. Repeated exposure to very high concentrations of styrene vapor may cause hearing impairment.

Symptoms/effects after skin contact:

May cause irritation, skin sensitization (redness, burning, swelling, itching).

Symptoms/effects after eye contact:

Eye irritation. Redness, itching, tears.

Symptoms/effects after ingestion:

Abdominal pain, nausea.

4.3. Indication of any immediate medical attention and special treatment needed

The decision on how to proceed with the rescue should be made by the doctor after careful assessment of the victim's condition. In case of severe poisoning, measures to prevent liver damage should be given; control the function of the heart and circulatory system. There is no antidote. Treat symptomatically.

5. Firefighting Measures

Fire hazard:

Flammable liquid and vapour.

Hazardous decomposition products in case of fire:

During combustion, hazardous vapors and gases containing thermal decomposition products, carbon oxides and soot may be formed. Avoid inhalation of combustion products, they may be hazardous to health.

5.3. Advice for firefighters

Protection during firefighting:

General protection measures typical in case of fire. Do not stay in the fire zone without appropriate clothing. Recommended personal protective equipment for emergency services: full protective suit, self-contained breathing apparatus. Proceed with firefighting waters as in subsection 6.2. and 6.3.

6. Accidental Release Measures

6.1. Personal precautions, protective equipment and emergency procedures

6.1.1. For non-emergency personnel

Protective equipment: For further information refer to section 8: "Exposure controls/personal protection". Wear recommended personal protective equipment. See Section 8.

Emergency procedures: Ventilate spillage area. No open flames, no sparks, and no smoking. Do not breathe vapours, spray. Avoid contact with skin and eyes.

6.1.2. For emergency responders

Protective equipment: Do not attempt to take action without suitable protective equipment. For further information refer to section 8: "Exposure controls/personal protection".

6.2. Environmental precautions

Avoid the formation of vapors. In case of spillage, steps should be taken to prevent it from spreading into the environment – prevent it from reaching sewage systems, water reservoirs, rivers, groundwater and soil. Do not use open fire, avoid sparks, eliminate ignition sources. Notify the appropriate emergency services. Warn others about the danger. Similar precautions should also be taken in the event of fire water.

6.3. Methods and material for containment and cleaning up

For containment: In case of large spills, embank the accumulating liquid, pump it out to appropriate, sealed and labeled containers and send it for recovery or neutralization in accordance with the provisions of the Act on waste. Use sorbent kits to remove the remains and small amounts of the spilled product, and failing that, use diatomaceous earth or sand. Collect the absorbent agent containing the product to an appropriate, sealed and labeled waste container and recycle or neutralize it in accordance with the provisions of the Act on waste.

Methods for cleaning up: Take up liquid spill into absorbent material. Notify authorities if product enters sewers or public waters.

Other information: Proceed in accordance with the Environmental Protection Law and the Waste Act. Dispose of materials or solid residues at an authorized site.

6.4. Reference to other sections

For further information refer to section 13.

8.2. Exposure controls

8.2.1. Appropriate engineering controls

Appropriate engineering controls:

Ensure adequate ventilation in confined areas. If ventilation is not sufficient, to keep vapour concentrations below the limit values use the appropriate respiratory protection. Personal protection equipment should be selected on the basis of substance concentrations at individual work stations, exposure time, operator functions and recommendations indicated by the supplier of the equipment. In explosion-risk areas, wear clothes, gloves and boots with electrostatic discharge protection function. Procedures for monitoring concentrations of hazardous components in the air and procedures for air cleanliness in the workplace should be applied – as long as they are available and justified at the workplace – in accordance with the relevant reference methods – standards in force in Poland. The mode, type and frequency of tests and measurements should meet the requirements of the Regulation of the Minister of Health of February 2, 2011 on tests and measurements of factors harmful to health in the work environment (Journal of Laws No. 33 item 166, as amended).
